

ALL ABOARD.  
THE NEXT STOP: THE FUTURE.

For us, RAIL.ONE is not only a name: it's at the same time our corporate objective and the symbol of our self-image. We keenly want to be the initial contact partner. For our customers and for our partners – and naturally also for potential colleagues. After all, an outstanding team is the very basis of our services-oriented and top-performance claim. Every day, our staff are busy producing new and individual solutions and innovative technology for railway transport. And this is why we offer talented possible colleagues and experienced professionals an environment in which they can employ their dynamic skills to produce professional success. Pupils find an apprenticeship at RAIL.ONE, and students can get to know our company during internship or placement, or within the context of a master's thesis. We offer college and university graduates and applicants with professional experience outstanding career opportunities and prospects for interesting international projects.

AT RAIL.ONE, CAREERS GO ON TRACK.

COMPETENCE

QUALITY

FLEXIBILITY

INNOVATION

INTERNATIONAL  
OPERATIONS

If you are looking for exciting challenges on the global railway market, if you want to benefit from first-class prospects at an internationally successful company – and if you set high value on a good working atmosphere at the same time, then you have found the right place at RAIL.ONE. Get in touch with us and find out more details. We are looking forward to meeting you.

**RAIL.ONE GmbH** | Wolfgang Bayer

**RAIL.ONE**  
The way to go.

WE DRIVE PROGRESS.

PURPOSEFUL. ADVANCED. PIONEERING.

At the beginning of any infrastructure project is a vision: People, cities, and countries are moving closer together, and freight is arriving even faster at its destination. Together with our partners, we turn this vision into reality: as one of the leading concrete-sleeper manufacturers, we have been closely associated with the railway market for almost 100 years now. With our locations in Germany, Europe, America, and Asia, we carefully target new markets and develop the technical solutions for international railway transport of the future. In our work we insist on the highest in quality standards, professional consulting, and reliable service. On ballast, concrete, or asphalt – as well as for passenger, freight, and heavy-haul transport: with our customers in Germany, Europe, and around the world, we develop solutions tailored to individual requirements – **Engineered by RAIL.ONE**. Become part of a company that, already today in its international projects, is entering markets of the growth regions of tomorrow – and that uses its energy to move people and markets.

WELCOME TO RAIL.ONE.  
YOUR CHANCES OF A CONNECTION.

We are looking for staff who eagerly work in teams, who appreciate innovative products, and who feel comfortable in an open corporate culture.

#### DEVELOPMENT, PROJECT, AND CIVIL ENGINEERS

You would dimension and engineer our concrete sleepers and track systems, support Sales, and define specifications for Production. You would develop innovations that will continue to assure international prominence for RAIL.ONE.

#### GENERAL MANAGER

You would have overall responsibility for one of our international subsidiaries and would organize its work together with our business partners and our headquarters. As manager, you would actively contribute to shaping the future of our company.

#### SALES MANAGER

You would create and implement international market-development and marketing strategies. By developing new customer relations and cultivating existing contacts, you would open new sales potential for RAIL.ONE.

#### PLANT MANAGER

You would direct a RAIL.ONE factory in one of our worldwide markets and would ensure maintenance and optimization of the operational processes. Together with your colleagues, you would produce at top quality and to the agreed delivery dates.

#### PROJECT MANAGER

You would be responsible for implementation of international projects and would provide the interface between customers and internal departments. You would keep our projects on successful track.

#### QUALITY MANAGER

You would, as manager responsible for quality, support production, localize and analyze possible error sources, and optimize the quality of internal production processes and of our products. Your management activities would implement the high quality standards expected of RAIL.ONE.
